# CLINiLABS

Technology Tools for Clinical Trials

ClinVia™

Validated, secure electronic data transfer application that allows users to upload and download clinical trial data to a hosting data center.
- Eliminates mailing of electronic media
- Browse, select, and attach files for quick transfer
- View hosted files in a compliant environment
- Standard and customized reports regarding file status

ClinVia is the standard of choice for the transfer and central processing of the following types of clinical trial data at our core data center.
- Electronic source documents & informed consent forms (ICFs)
- Polysomnography
- Electroencephalography, Electromyography & Electrocardiography
- Actigraphy
- Images and videos

Clinical InSite™

Validated, Microsoft Sharepoint document management tool.
- Clinical trial document management
- Cost effective e-Room

When combined with ClinVia, InSite™ may be used for:
- Remote source document verification
- Audit trail, sticky notes, remote query resolution

Clinilabs Core Data Center

Centralized data processing and management for multicenter studies.
- Secure facility with N+1 redundant servers w/ 100 MB optical fiber
- Global capability – 42 countries served
- Multiple EDC tools, Medidata Rave™ certified

Clinical Research Unit Technology

Our two Phase 1 units provide technology enhanced services.
- Laboratory information management system, with barcoding (coming 2015!)
- Mortara Surveyor™ telemetry
- Clinical Conductor™ to support study management
- Verified Clinical Trials™ for subject authentication
- Compumedics and Natus EEG/PSG/EMG technology
- Electronic TMS Training Management System to support staff training
